

ASE 230 Tools — Read in This Order

These slides cover the tools HW1 asks you to install and verify. Read each one before doing the matching install step in `HW1.md`.

1. `lecture/01. vscode.md` — install VS Code, confirm you can preview Markdown files, connect to WSL2 (Windows only).
2. `lecture/02. install_ase230_tools_with_wsl2.md` — **Windows only**. Skip this if you're on macOS or Linux.
3. `lecture/03. php installation.md` — install and verify PHP.
4. `lecture/04. mysql installation.md` — install and verify MySQL.
5. Go back to `HW1.md` and complete the **Verify** steps for each item — that's what's actually graded.

Optional, not required for HW1: `lecture/VS Code Reference.md` —
